### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Ellis et al. (U.S. Patent No. 6,256,292).

Regarding claims 1-3, Ellis teaches a SONET and ATM hybrid data network including a plurality of STS-1s (STS-1 # 1 – STS-1 # 3) that combine into a single source port (see figure 8, and column 12, lines 1-8). The operation of the source port is further illustrated in figure 9. A data flow path is established between a source port at interface 50 and a destination port at interface 60. Incoming and outgoing traffic passes through working ports at interfaces 50 and 60, and is routed to one of the STS-1s (see column 12, lines 44-55 and column 13, lines 10-15). A cell control unit determines a path identifier for routing data between source and destination ports in an STS-1 (see column 19, lines 35-39). Address translation is performed at a control unit 102 and is handed off to the STS management unit 70 (see figure 10, and column 14, lines 51-58), which supervises the incoming and outgoing communication between the ports (see column 13, lines 5-15).

**Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kamran Emdadi whose telephone number is 571-272-6047. The examiner can normally be reached Monday-Friday between the hours of 7am-5pm.
